Water Quality in Animas River in Colorado at Pre-Spill Levels

Water quality in the Animas River from the Silverton, Colo., area to the Durango municipal water intake has returned to pre-spill levels a week after the EPA triggered a 3-million-gallon release of mining waste. EPA Administrator Gina McCarthy says during a visit to Durango that the determination was based on water samples collected at numerous intervals beginning Aug. 5, when EPA investigators accidentally unleashed the mining wastewater at the Gold King Mine.
